## **About the Editors**

**Michael Stocking** is Professor of Natural Resource Development and Dean of the School of Development Studies, University of East Anglia, Norwich, United Kingdom. He has been involved in tropical agricultural development, land resources, conservation of biodiversity, and soil conservation since 1969. With field experience in sub-Saharan Africa, South America, and South and South-east Asia, his work involves soils investigations, agro-biodiversity assessment and the relationship between land degradation and vegetation productivity. He is an adviser/consultant to several international agencies including FAO, UNEP, DFID and the GEF.

**Hilde Helleman** was an Associate Scientist at the International Centre for Integrated Mountain Development, Nepal. Her background is in environmental science, biodiversity, land use analysis and environmental policies. She is an adviser/consultant to several government and non-government organisations in rural and urban development programmes.

**Roger White** is Regional Coordinator for ICIMOD's People and Resource Dynamics in Mountain Watersheds of the Hindu Kush-Himalayas project (PARDYP). He is also ICIMOD's point of contact for watershed management issues. He has been involved with tropical agricultural development since 1977 and has lived in developing countries for the last 25 years: in Africa, the Middle East and South Asia. Prior to joining ICIMOD in 2000, he spent 10 years carrying out inventory and research relating to watershed management issues in the Central Hills of Sri Lanka for DFID.
