

## Management of Bees for Pollination

### Part 6

# Advances in Crop Pollination and Bee Flora Research

effective pollination of crops. They  
and yield of many entomophilous crops  
(Slay, 1988). Honeybees and wild  
bees are especially helpful and have been  
well managed for this purpose. For  
crop pollination management is required  
ends: crop and pollinator. This paper  
describes methods for management of
