

ICIMOD

ICIMOD is the first international centre in the field of mountain development. Founded out of widespread recognition of environmental degradation of mountain habitats and the increasing poverty of mountain communities, ICIMOD is concerned with the search for more effective development responses to promote the sustained well being of mountain people.

The Centre was established in 1983 and commenced professional activities in 1984. Though international in its concerns, ICIMOD focusses on the specific, complex, and practical problems of the Hindu Kush-Himalayan Region which covers all or part of eight Sovereign States.

ICIMOD serves as a multidisciplinary documentation centre on integrated mountain development; a focal point for the mobilisation, conduct, and coordination of applied and problem-solving research activities; a focal point for training on integrated mountain development, with special emphasis on the assessment of training needs and the development of relevant training materials based directly on field case studies; and a consultative centre providing expert services on mountain development and resource management.

MOUNTAIN FARMING SYSTEMS' DIVISION

Mountain Farming Systems constitutes one of the thematic research and development programmes at ICIMOD. The main goals of the programme include i) Technologies and Management Practices - Soil Fertility and Water Management; Integrating Indigenous Knowledge; ii) Strengthening Mountain Agriculture; iii) Integration of Gender Concerns in the Development of Sustainable Mountain Agriculture; iv) Agricultural Research Networking; and v) Agricultural Extension and Training.
