The Wonders of our World Series offers young readers a lively and visually exciting introduction to the world around us and the forces at work shaping our planet and its future. Ten books in this series offer fascinating full-colour photographs of examples from around the world to help illustrate:

- > The devastating impact volcanoes, extreme weather, and earthquakes can have
- > Why the earth's forests and waterways are in danger of destruction
- > How the earth's powerful internal forces produce rocks and minerals from the ordinary to the dazzling
- > How mountains, deserts, and caves are formed

Mountains are constantly being created, changed, and eroded. People and animals must adapt in order to survive this environment. Spectacular photos help reveal:

- > how mountains are formed
- > different kinds of mountains
- > ranges around the world
- > weather
- > plant and animal life
- > preservation

This book is suitable for ages 8-10. This book contains spectacular full-colour photographs that show how different kinds of mountains are formed and where these ranges are located in the world. Weather, plant, animal life and their preservation are also explored.
