

about the authors

Don Messerschmidt is an anthropologist who has worked extensively in social and community forestry in the Himalayas. He is the author of many articles on the subject. From 1997 to 2000 he was Team Leader and Social Forestry Planning Advisor on the World Bank/IDA and SDC (Swiss Development Cooperation) funded Third Forestry Development Project in Bhutan. Besides his part in this study of bamboo vulnerability, he coordinated, edited and co-authored an extensive study of the overall project entitled *Social Forestry in Eastern Bhutan: A Study of the Third Forestry Development Project, 1994-2000*. He can be contacted at <emodus@juno.com>.

Karma Jigme Temphel is a forester with experience in participatory agroforestry and community forestry. He has specialised training from the University of the Philippines, Los Banos and from the University of Wolverhampton in the UK. During the 1990s he worked extensively on the Third Forestry Development Project, and led the bamboo study upon which this article is based. He can be contacted at <kj_temphe@yahoo.co.uk>.

William D. (Bill) Incoll is a forester who has worked primarily in forest inventory and forest management planning, for several years in Bhutan and Nepal, but also in Australia and the Pacific. As Forest Management Specialist in the Third Forestry Development Project from 1997 to 2001 his involvement in the bamboo work was to provide for both properly planned sustainable commercial harvesting and the continued traditional use of the forest by local communities. He can be contacted at bincoll@bigpond.com.

John Davidson is a forestry consultant who has worked worldwide and particularly in Asia on temperate and tropical broadleaved forest conservation, utilisation and natural regeneration. From 1997 to 2000 he was Silviculturist/Plant Ecologist for Bhutan's Third Forestry Development Project, conducting research in the broadleaved forest ecosystems in the eastern part of the country. He can be contacted at <jdavidso@northnet.com.au>.
