

About the Editors

Roger White has worked on natural resource management and watershed management in Africa and Asia for 30 years. After completing a masters degree in Tropical Agronomy he worked in Mozambique and Somalia on pasture and rangeland management and soil conservation. Following three years of rural development work in Northern Nigeria he led a DFID-funded land use planning programme in Tanzania. In 1989 he moved to Sri Lanka where he spent 11 years working on watershed management issues for the Mahaweli Authority of Sri Lanka particularly on soil erosion, reservoir sedimentation, and livelihood issues. In 2000 he joined ICIMOD as Regional Coordinator of the People and Resource Dynamics in Mountain Watersheds Project. He also manages ICIMOD's Action Initiative on Watershed Management across the Himalayas.

Sanjeev Kumar Bhuchar

Sanjeev Kumar Bhuchar has over ten years of experience in the field of watershed management. After completing a Master's degree in Botany from Kumaun University, India, he joined the G.B. Pant Institute of Himalayan Environment and Development (GBPIHED–Uttaranchal, India) in 1993 as an ecologist in ICIMOD's regional project on rehabilitation of degraded lands. He continued to serve GBPIHED as a scientist fellow for common resources in PARDYP, and at the same time completed his PhD in botany from Kumaun University. He joined ICIMOD full-time as assistant programme coordinator - PARDYP in May 2003. He has extensive field-based research experience in the participatory development of common property resources in particular relating to degraded lands. He has travelled widely in the upland communities of the Himalayas.
