

# about the authors

Piers Blaikie is a Professor at the School of Development Studies, University of East Anglia, Norwich, England, and Second Professor at the Department of Geography, Norwegian University of Science and Technology, Trondheim, Norway. He has worked as a researcher and consultant in South Asia, especially India and Nepal, for over thirty-five years and for over ten years in eastern and southern Africa. His best known books and monographs, solely or jointly authored, in the field of policy and environmental issues include:- Rethinking Land Degradation in Developing Countries (1995, World Bank), At Risk: Natural Hazards, People's Vulnerability and Disasters (1994), Land Degradation and Society (1987), The Political Economy of Soil Erosion in Developing Countries (1985), Nepal in Crisis: Growth and Stagnation at the Periphery (1980), Struggle for Basic Needs: a Case Study in Nepal (1979), and Family Planning in India: Diffusion and Policy (1975). His current interests remain in environmental policy, conservation, and agrarian political economy

Syed Zahir Sadeque has a doctorate in Development Sociology from Cornell University and is the Social Scientist at ICIMOD. Dr. Sadeque has previously taught Sociology in two universities in Bangladesh. Prior to joining ICIMOD in 1996 he was the Team Leader for the Water and Sanitation Programme of The World Bank in Bangladesh. He has also worked for USAID and CIDA in Bangladesh as the Environmental and Social Development Specialist and Rural Development Specialist respectively. He has published widely on social/institutional issues and Natural Resources in South Asia. His recent research interest is in social capital, poverty, and social exclusion and participatory governance.
