PREFACE

ACKNOWLEDGEMENTS

Much of this report was fleshed out after the project review meeting in Pokhara in 1994. I am extremely thankful to all those who were with me in Pokhara, particularly Dr. Mahesh Banskota whose ability to synthesise a wide range of issues and to give the right pragmatic touch to research continues to amaze me.

Thanks are due to Anupam Bhatia (ICIMOD) and Aromar Revi (TARU) for encouraging me to coordinate the programme. I thank Dr. Inger-Marie Bjønness, First Secretary, Development, NORAD, for placing confidence in the team and also for having shared her insights on these issues.

My colleagues and I have found for ourselves a great ally in our collective efforts, Dr. Pitamber Sharma. If there is one soul to whom this effort could be dedicated it is definitely Dr. Pitamber Sharma whose moral pressures and concise directions have made this enterprise a very meaningful adventure.

I thank Mr. Egbert Pelinck, the Director General of ICIMOD, whose affable ways draw the best from the professionals who interact with ICIMOD. The team acknowledges the excellent understanding ICIMOD has shown throughout the course of this project.

On behalf of the sponsors, the coordinator, and all the team members, I thank the officials, citizens, and researchers who spared the time to discuss with us in the field, in meetings, and through comments on our notes and their inputs made this report possible.

**R. Sreedhar

1 Introduction 1

This study presents an analysis of the state of tourism in the Indian State of Himachal Pradesh and the hill districts of Uttar Pradesh and brings out the major issues with respect to tourism and economic and environmental development of local communities.

The study is one of a series of reviews of the status of mountain tourism in the hills and mountains of Nepal; the U.P. hills and Himachal Pradesh of India; and in the North West Frontier Province and the Northern Areas of Pakistan. The studies are intended to provide a comparative perspective on the type, nature, problems, and issues of mountain tourism in the Hindu Kush-Himalayan Region. All of these studies and papers have resulted from a NORAD-funded Project entitled, "Mountain Tourism for Local Community Development," and are being published in the MEI Discussion Paper Series.

On behalf of ICIMOD, Dr. Pitamber Sharma is the Project Coordinator as well as the technical editor of these papers.

Lack of Retention of Benefits from Tourism in Tourist Areas	10
Problem of High Level of Seasonality	10
Problem of Policy and Institutional Development	10
Specific Problems of Local Community Development	11
