

THE AUTHORS

Dr. L.A. (Sampurno) Bruijnzeel is a lecturer in soil physics and tropical watershed management at the Faculty of Earth Sciences of the Free University in Amsterdam, the Netherlands.

His main research interest concerns the interactions between atmosphere, vegetation and soils. He has conducted research to this end in Indonesia, Malaya, the Philippines and the Netherlands since 1976. He first visited Nepal in 1972 and returned several times since then.

Christiaan Bremmer is a graduate student in hydrology at the above university. Apart for working a draft review on land-use influences in the Ganges basin, he has carried out a study of groundwater recharge in a limestone area in Indonesia. He is currently involved in mass-wasting and erosion research in East Java and hopes to finish his studies in August, 1989.
