

Dr. Narpat Singh Jodha is Head of Mountain Farming System Division at the International Centre for Integrated Mountain Development (ICIMOD). Previously he worked at International Crops Research Institute for Semi-Arid Tropics (ICRISAT) Hyderabad, (India), International Institute of Tropical Research (IITA) Ibadan, (Nigeria), and a number of organisations in India including Indian Agricultural Research Institute (IARI), New Delhi. With specialisation in Agricultural Economics and Resource Economics, he has extensively written and advised on subjects as far ranging as technology for rainfed agriculture to management of rural commons.

Dr. Mahesh Banskota is currently the Chief Programme Coordinator at the International Centre for Integrated Mountain Development (ICIMOD). Previously he has worked with Centre for Economic Development and Administration (CEDA) of Tribhuvan University, Kathmandu, the National Planning Commission, Royal Nepal Airlines Corporation and the Nepal Administrative Staff College. He has also served as Director on the Board of Governors of the Nepal Rastra Bank. His main interests are in economic development, regional planning and environmental management. He has written extensively on these topics.

Dr. Tej Partap is a Professional Staff Member in the Mountain Farming Systems Division of ICIMOD. An ecologist specialising in agroecology and genetic resources. His past work as a researcher in Himachal Pradesh University Shimla and later in ICIMOD focussed on neglected, underexploited genetic resources, and their crucial roles in sustaining mountain agriculture. His work is directed to linking farmers' traditional technologies and modern research based technologies. While working in mountain areas for over two decades he has acquired vast experience on mountain agroecosystems.
