WATERSHED MANAGEMENT EXPERIENCES IN THE HINDU KUSH-HIMALAYAS

AN OVERVIEW

MEM Series No. 3

Kk. Panday is a staff member of the Mountain Environmental Management Division of ICIMOD.

International Centre for Integrated Mountain Development (ICIMOD)

Kathmandu, Nepal

PREFACE

CONTENTS

From the time of its inception, improved management of mountain watersheds has been one of the major areas of concern for ICIMOD. One of the first activities of ICIMOD was the organisation of an international workshop on this theme in Chengdu, China. Integrated management of watersheds remains one of the principal focal programmes of the Mountain Environmental Management Division of ICIMOD which is primarily engaged in developing, mobilising, and disseminating alternative strategies and techniques for sustainable economic and ecologic development of mountain environments and the people living therein, with a primary focus on the Hindu Kush-Himalayas.

This paper was prepared for, and presented at, the International Workshop on Watershed Management Experiences in the Hindu Kush-Himalayan Region, held in Chengdu, China, 14-19 October 1985, in collaboration with the Commission for the Integrated Survey of Natural Resources of the Chinese Academy of Sciences, China.

Kk. Panday, in this overview, summarises the country experiences in Watershed Management in the Hindu Kush-Himalayan Region.

CONTENTS

PREFACE

Introduction

Watersheds in the Hindu Kush-Himalayan Region

Watershed Degradation Indicators

Vegetation Cover

Contributing Factors

Off-site Resource Use Rationale

Concepts of Watershed Management

Watershed People/Actors

Watersheds and Watershed Management

Watershed Management in Practise

Administrative and Organisational Structure

People's Participation

Research, Education, and Training

Instruments of Management

Programme Priority and Performance

Changes, Ideas, and Issues

Problem Recognition

Knowledge Gap

Further Issues
