---

ICIMOD's approach to problem-oriented research involves both knowledge reviews and field studies. The focused reviews and field studies conducted by the Mountain Farming Systems Division cover various aspects of agricultural development. Since early 1988, a series of 'State of the Art' reviews of agricultural policies and programmes were sponsored by ICIMOD in different countries of the HKH Region. The purpose of these studies and the subsequent National Workshops in different countries was to understand some of the constraints and prospects of mountain area development. These exercises were also aimed at acquiring comparative perspectives of development approaches and strategies in different countries.

**R. S. Rana**

This paper was a part of this series of studies commissioned by ICIMOD, and was also presented at the Workshop on 'Horticultural Development in the Hindu Kush-Himalayas' organised by ICIMOD, the Ministry of Agriculture of HMG (Nepal) and the Food and Agriculture Organisation of the United Nations (FAO), Nepal, from 19-21 June, 1989. The focus of the paper is the advent, establishment, and role of the Himachal Pradesh Horticultural Produce Marketing and Processing Corporation in the development of horticulture. The author has traced and outlined its current constraints and opportunities. The paper also contains a number of recommendations for future consideration.

---

R. S. Rana was the Managing Director of the HPMC and also an advisor on horticulture to the Himachal Pradesh Government. He has now established his own consultancy.

## PREFACE

### Introduction

### The Horticultural Sector of Himachal Pradesh

ICIMOD's approach to problem oriented research involves both knowledge reviews and field studies. The focussed reviews and field studies conducted by the Mountain Farming Systems' Division cover various aspects of agricultural development. Since early 1988, a series of 'State of the Art' reviews of agricultural policies and programmes were sponsored by ICIMOD in different countries of the HKH Region. The purpose of these studies and the subsequent National Workshops in different countries was to understand some of the constraints and prospects of mountain area development. These exercises were also aimed at acquiring comparative perspectives of development approaches and strategies in different countries.

This paper was a part of this series of studies commissioned by ICIMOD, and was also presented at the Workshop on "Horticultural Development in the Hindu Kush-Himalayas organised by ICIMOD, the Ministry of Agriculture of HMG (Nepal) and the Food and Agriculture Organisation of the United Nations (FAO), in Kathmandu, Nepal, from 19-21 June, 1989. The focus of the paper is the advent, establishment, and role of the Himachal Pradesh Horticultural Produce Marketing and Processing Corporation in the development of horticulture. The author has traced and outlined its current constraints and opportunities. The paper also contains a number of recommendations for future consideration.

### Physical Infrastructure

### Activities and Functions

### Achievements to Date

### Benefits to Producers

### Difficulties Experienced and Lessons Learned

### Conclusions and Recommendations

## TABLES

1:	Compound Growth Rates of Area, Production, Productivity, and Prices of Apples	3
2:	Cartons Supplied to Growers and the Export of Apples from the State	13
3:	Prices Realised from the Sale of Different Categories of Boxes of Apples	13

## ANNEXES

I:	Area and Production of Apples and Other Fruits in Himachal Pradesh	19
II:	Activity-wise Physical Performance of the Last Five Years	20
