## ICIMOD Publications Available to All

ICIMOD Books On-line is a new service from ICIMOD, that provides direct access to all technical and scientific publications published by the Centre to download or order. It has full-text and chapter-wise download options (pdf format) for all books published from 2000 onwards and some selected earlier publications (scanned), and cover and table of contents files for the remaining publications. Books On-line has a link for ordering hard copies (or photocopies of out-of-stock publications), or pdf files of those not posted in full (scan on demand).

The publications are grouped in sixteen subject areas and can be searched using full-text contents, titles, year of publication, keywords, and by language, author (last name), and subject area. As of 5 June 2007, 170 publications have been posted: 120 in complete form and 50 with cover and table of contents

The publications in the collection are mostly in English, with some in regional languages: Bengali, Chinese, Hindi, Nepali, Tibetan, and Urdu.

<input type="text"/> <a href="#">Advanced Search &gt;</a>	<p>ICIMOD BOOKS ON-LINE provides direct access to all ICIMOD technical and scientific publications. It holds full-text and chapter-wise download options (pdf format) for publications published from 2000 onwards and some selected earlier publications (scanned documents), and table of contents download and pdf request options for earlier publications. There is a link for ordering hard copies (or photocopies if out-of-stock). ICIMOD BOOKS ON-LINE can be searched using full-text contents, title, year of publication, keywords, language, author and broad subjects.</p> <p><b>SearchTips</b>            If you are looking for a specific book, use 'advanced search options'. Combine multiple entries (title, year of publication, and so on) to make the results more precise. The search format is 'AND', only results showing all the selected entries will be shown.</p> <p>If you are looking for any publication on a certain topic, use full-text search. Enter as many words as you need to define the topic, only entries including all words anywhere in the book (title, text, front matter) will be displayed. Note that most older publications will be restricted to title and table of contents searching (as pdf files are either not included, or are prepared from scanned documents).</p> <p><b>Click on the title in the display window</b> to get details of a particular document.</p> <p>Full text Search <input type="text"/> <input type="button" value="Search"/></p> <p>Advanced Search</p> <p>Title <input type="text"/> <input type="button" value="Publications"/></p> <p>Year of Publication <input type="text"/></p> <p>Keywords <input type="text"/></p> <p>Language --- Select One --- <input type="button" value="v"/></p> <p>Author <input type="text"/></p> <p><input type="button" value="Search"/></p>
